

I urge you to allow XM Radio to continue to broadcast traffic and weather as their job is essential and much more thorough than many of the local broadcast stations can be. The difference is worth listening to in order to fully understand just how valuable XM Radio really is. The traffic channel and weather channel for each area covered is constantly updating and always revealing. Its accurate as best I can tell and superbly informing. Should any obstacles show up in my travels, I know that I can turn to the traffic channel and be advised within moments of the delay I can see ahead of me and which if any of better routes are available. The regular AM and FM channels don't do this as throughly. Please reject NAB's petetion 04-160. It is not in the best interest of the public who rely on XM Radio.

Respectfully yours,

William Felton
